HASHIMA GENERAL CATALOG

Inspection Machine Series

The best of Needle Detector in the industry

In production since 1994 and soon to be 30 years old .Over 21,000 single type needle detector produced.Over 4,500 two-head type needle detector produced.Cumulative total of needle detector machines: over 25,500 units

※As of April 2022

Conveyor type
Nendle detector
(single head)

HN-880CS
HN-790GS

Redesigned Hashima noise cancel function

Noise is reduced by mounting the amplifier board inside the sensor head.
A new noise filter significantly reduces noise from the needle detector itself as well as noise from outside.

Detector

Fastest conveyor speed in the industry

Hashima's Conveyor Needle Detector has high belt roatation speed, so it can be achieved high productivity and improved work efficiency.

Reference Video for
conveyor speed

Fe ϕ 0.8mm can be detected with a gate height of 120mm.

120 mm height is standard, and 140, 160, and 180 mm are available as factory options. (Refer to factory options below)

**The only one
in the industry.**

for Gate Height

SPECIFICATIONS

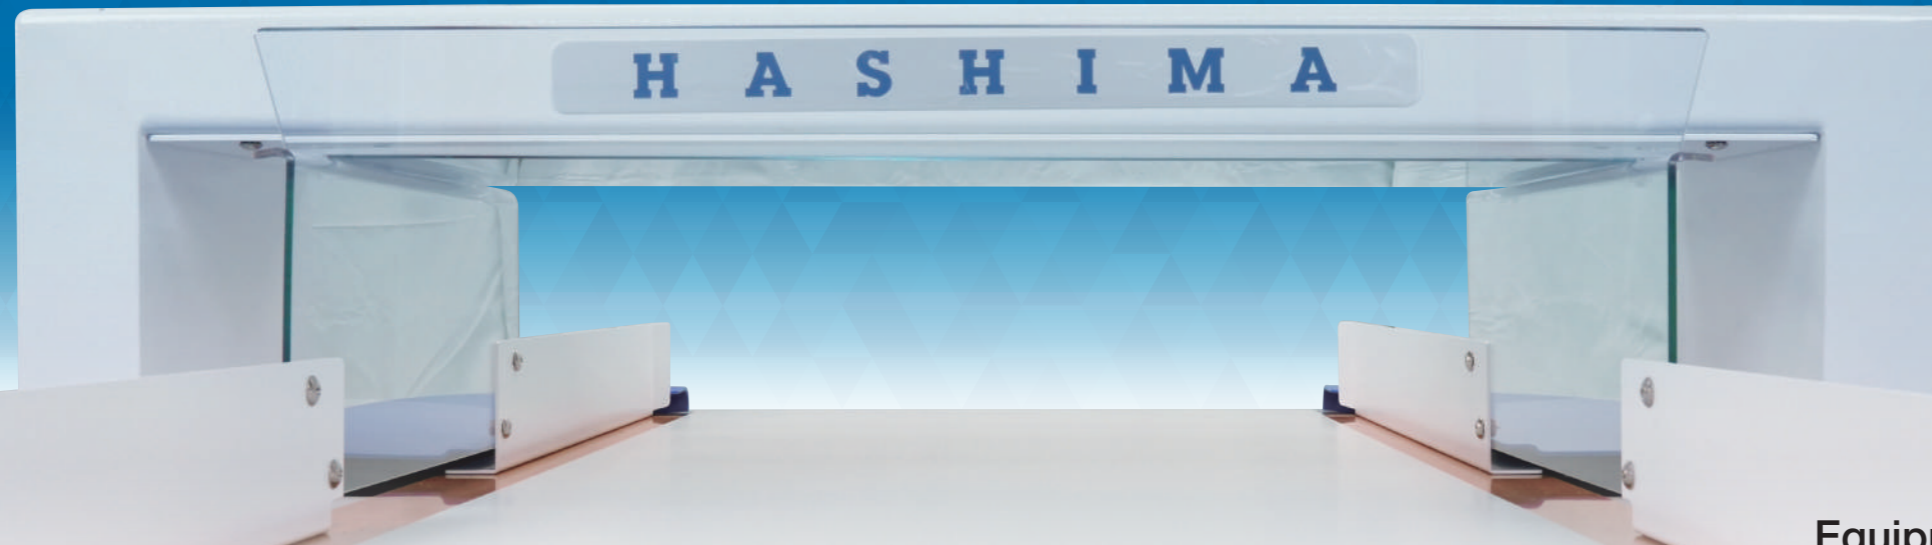

MODEL	HN-880CS	HN-790GS	HN-2880CS	HN-2790GS
DETECTION METHOD	MAGNET INDUCTION			
DETECTION Bailey	Fe0.8 ϕ sphere or above			
SENSITIVITY ADJUSTMENT	DECIMAL(100steps) orSIZING (6steps)			
DETECTION WIDTH	600mm			
DETECTION HEIGHT	120mm(standard)			
ALARM METHOD	BUZZER POSITION LUMP			
BELT SPEED	40~15m/min.			
POWER SUPPLY	single phase			
RATED OUTPUT	150W			
DIMENSIONS	1598(L) \times 950(W) \times 903(H)		2423(L) \times 1040(W) \times 903(H)	
NET WEIGHT	230kg		374kg	
PRODUCT GUIDER	Standard		Standard	

※Use non ferrous metal accessories for garments.
※Read instruction manual & test machine sensitivity before using.
※The specification is under standard test condition.
※We Have no responsibility that needle chip, iron chip etc.
Come out after detecting under non-standard condition.

FACTORY OPTION

MODEL	SNSOR HEIGHT	MAX. SENSITIVITY
HN-880CS	120mm	Fe 0.8 ϕ
	140mm	Fe 1.0 ϕ
	160mm	Fe 1.2 ϕ
	180mm	Fe 1.5 ϕ
HN-790GS	120mm	Fe 0.8 ϕ
	140mm	Fe 1.0 ϕ
HN-2880CS	160mm	Fe 1.2 ϕ
	180mm	Fe 1.5 ϕ
	120mm	Fe 0.8 ϕ
HN-2790GS	120mm	Fe 0.8 ϕ

※Please note that the sensitivity level that can be used may be limited by the surrounding environment and the product to be inspected.

Equipped with Detection Position Lamp

Hashima's unique sensor head uses a split detection coil, so when there is a detection, a lamp will indicate the position of the broken needle.

Reference Video for
Detection Position Lamp

Products Guider as standard.

The product guider helps inspection of thick clothing without malfunction.

Equipped with Hashima original conveyor belt

Conveyor belts used in Hashima's needle detector are developed and manufactured in-house.

Supper Fine Mode is equipped as standard.

Hashima's unique sensor head system makes it easier for accessories to pass through by inspecting them in super fine mode. (Conveyor speed moves slowly.)

Auto PreChecker®

Simplification of daily inspection! Increased work efficiency!

Auto PreChecker®

Auto PreChecker makes sensor checking more accurate and quicker. By using PreCheck Bar (Specialized test block) & system, you do not need to check each coil one by one, the system checks sensors automatically. Also you can keep the PreCheck result if you prepare the optional printer. (※PATENT PENDING, TRADEMARK REGISTRATION PENDING.)

Hashima Needle Detector Precision Inspection System Lightweight Compact **HN-C1**

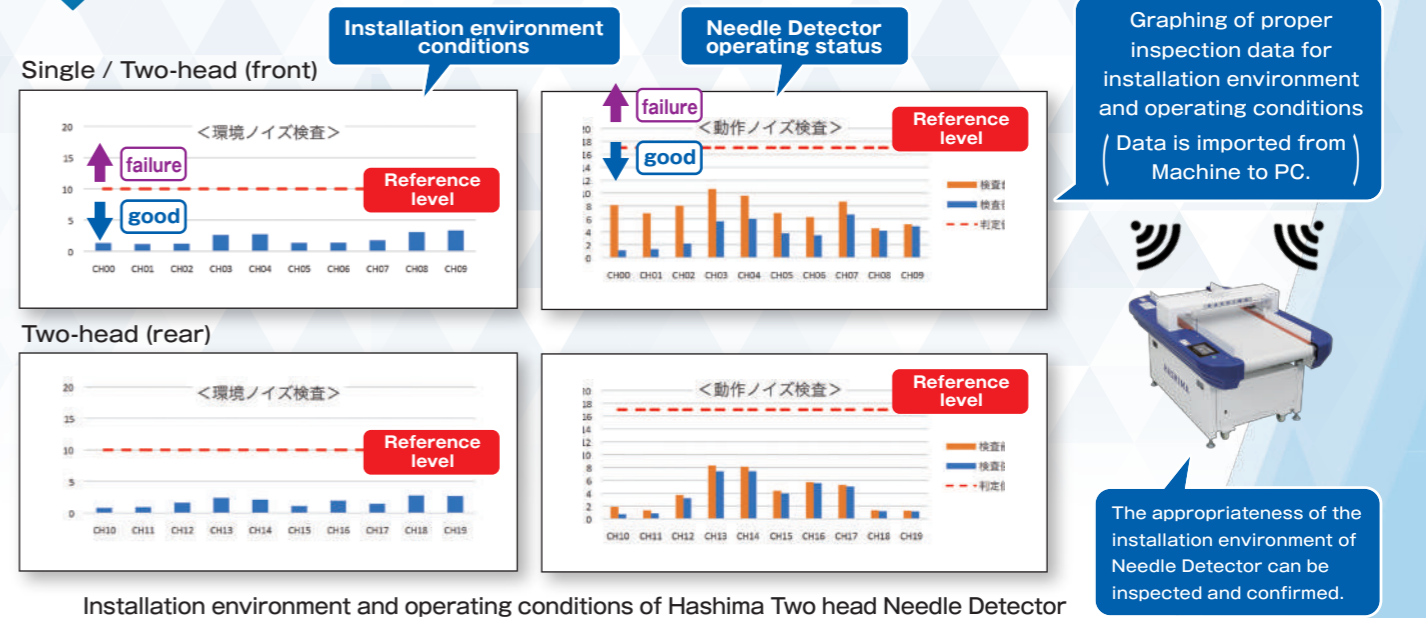

01 A new automatic inspection system automatically and precisely inspects **125 locations within the detection area**. Graphical indication of good/failure.

- Advantages
- Automatically inspectable
- Graphing of inspection results

Detection graph of hashima two-head Needle Detector

02 Graphical representation of the installation environment and inspection of operating conditions important for Needle detector.

Installation environment and operating conditions of Hashima Two head Needle Detector

Graphing of proper inspection data for installation environment and operating conditions (Data is imported from Machine to PC).

The appropriateness of the installation environment of Needle Detector can be inspected and confirmed.

03 Electronic data with certificate and report.

Report-1

Report-2

Needle Detector precision inspection certificate (electronic certificate)

Hashima confirmed and authenticated → Issued

After inspection, a "Report-1-2" will be issued, and if the level is cleared a certificate of precision inspection* is officially issued.

*This precision inspection service is performed by an authorized Hashima technician. If the inspection results do not meet the requirements, certificate will not be issued.

04 The original inspection report is stored on the Hashima Cloud Server and can be accessed at any time and from anywhere. You can check it.

QR code is included on the certificate, allowing easy confirmation of test results.

QR code on the certificate Secure service for easy confirmation of inspection results

PDF certificates and reports can be downloaded from the Hashima Cloud server from anywhere by reading the QR code, allowing you to share information with your customers.
